

# Programme

Dagskrá · 5–8 October 2026

The workshop is held in the meeting room on the 1st floor of MFRI, by the canteen. The agenda is generated from [data/agenda.csv](#) — edit that file to update every page and slide.

## Day 1 · Monday 5 October

Mánudagur 5. október — Calibration & sonar data

| Time        | Session                                                       |
|-------------|---------------------------------------------------------------|
| 09:00–10:30 | <b>Calibration of EK80, ADCP / Pinnacle</b> · Sigvaldi, Frank |
| 10:45–11:30 | <b>Hands-on exercise on board the new vessel</b>              |
| 11:30–12:00 | <i>Lunch</i> · Matarhlé                                       |
| 12:30–16:30 | <b>Analysis of sonar data</b> · Hector, IMR                   |

## Day 2 · Tuesday 6 October

Þriðjudagur 6. október — ADCP operation & processing

| Time        | Session                                                                         |
|-------------|---------------------------------------------------------------------------------|
| 08:30–11:30 | <b>ADCP settings and operation — EC150 and Pinnacle</b> · Frank, WHOI · Andreas |
| 11:30–12:00 | <i>Lunch</i> · Matarhlé                                                         |
| 12:30–13:00 | <b>ADCP lecture</b>                                                             |
| 14:30–16:30 | <b>Data processing and display during the cruise</b> · Frank, WHOI · Andreas    |

## Day 3 · Wednesday 7 October

Miðvikudagur 7. október — Scrutiny, biomass & data infrastructure

| Time        | Session                                                                                                |
|-------------|--------------------------------------------------------------------------------------------------------|
| 08:30–10:15 | <b>Advanced acoustic scrutiny with Korona for behavioural analysis</b> · Kjetil, DTU                   |
| 10:15–12:15 | <b>Field trip — Teledyne Gavia, Kópavogur: field AUV demonstration and presentation</b>                |
| 12:15–12:45 | <i>Lunch</i> · Matarhlé                                                                                |
| 13:00–14:00 | <b>Korona libraries and noise removal with LSSS</b> · Teresa                                           |
| 14:00–15:00 | <b>NMEA extraction using Korona &amp; estimation of biomass in R</b> · Sigurður                        |
| 15:15–16:00 | <b>Introduction to AI for processing data using Python</b> · Mandana, HI / MFRI                        |
| 16:00–16:30 | <b>Acoustic database, Screen Connect, MFRI acoustic data in the cloud</b> · Sigurvin, Teresa, Sigurður |

## Day 4 · Thursday 8 October

Fimmtudagur 8. október — Project work

| Time        | Session                                                                                                                                                            |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09:00–12:00 | <b>Working project — Comparative analysis of acoustic measurements of two capelin stocks (Iceland–East Greenland–Jan Mayen and the Barents Sea)</b> · Project 9123 |
| 09:00–12:00 | <b>Working project — Current measurements</b> · Project 14224                                                                                                      |

| Time        | Session                                                                                                                                                                               |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12:00–12:30 | <i>Lunch · Matarhlé</i>                                                                                                                                                               |
| 12:30–15:00 | <b>Working project — Comparative analysis of acoustic measurements of two capelin stocks (Iceland–East Greenland–Jan Mayen and the Barents Sea) (continued)</b> · <i>Project 9123</i> |
| 12:30–15:00 | <b>Working project — Current measurements (continued)</b> · <i>Project 14224</i>                                                                                                      |
